

Take It & Make It

July 2022

Supplies List: 14in Wooden Sign Board, 1 oz red paint, ribbon, jute (to hang your sign) craft wire, Paint brush, painters or masking tape.

To add the word Welcome we used a Cricut and adhesive vinyl. You could also use a decal, stencils, or even freehand your letters.

Tape off center of your sign to paint, then apply your red paint.

Let paint dry completely and then remove the tape

Remove the clear plastic film from the back of your vinyl transfer.

Carefully place it on the center of your sign over the red painted area.

Smooth into place and slowly pull the clear transfer tape leaving the white letters on the sign.

Attach the bow (bow instructions on next page) using the craft wire.
Thread the jute through the pre drilled holes and tie off

Bow Instructions

Locate the ribbon in your craft kit.

Continue making loops and twisting the ribbon where it meets in the center until you have two loops on each side of the center loop.

Make a small loop for the center of the bow.

With the rest of the ribbon, make a large loop at the bottom of the bow, overlapping the last inch of ribbon beneath the center of the bow.

Twist the tail of the ribbon to keep the pattern on the outside of the loops. Hold it securely below the center loop.

Secure the center loop, all of the ribbon twists, and the end of the ribbon with wire tightly.

Make a loop on one side of the center loop. This will be one of four side loops.

Cut the center of the large loop at the bottom of the bow to create your tails.

Twist the ribbon where it collects below the center loop to keep the pattern on the outside.

Fluff and arrange loops and tails to your liking.
